INTRODUCTION

The XTENDEX Series CAT5 Extender (XTENDEX) is designed to enable one CPU to be controlled by two users, one local and one remote. The remote user can be located as much as 300 feet away from a PS/2 CPU via Category 5 unshielded twisted-pair cable. The local user will be located near the CPU.

The XTENDEX Series Extender is extremely simple to install and has been thoroughly tested to insure reliable performance. Through the use of Category 5 cable it is possible to economically increase the flexibility of a computer system. Here are some of the features and ways this can benefit any workplace:

- Allows the placement of computer peripherals (monitor, keyboard, and mouse) in a location where only these parts are needed without having the CPU there too, taking up valuable space
- Allows a PS/2 CPU to be accessed by both a local and remote user (up to 300 feet away)
- Compatible with VGA and XGA systems
- Provides crisp and clear resolution up to 1280 x 1024 @ 300 feet (see page 11 for more details)
- Compatible with all NTI switches and splitters, enabling the joining of products to create a system that satisfies all networking needs
- Video quality, for varying lengths of cable, is manually adjustable (see page 10) providing optimum image quality
- Audio frequency response is 20Hz to 20Khz, ± 1dB (models with audio support only)
- Digital transmission of audio signals reduces any loss in quality (models with audio support only)

This manual covers each of the XTENDEX Series CAT5-300 Extender models offered. Some features described in this manual are available in some models and not in others. The chart below shows the features supported in each:

Model	Video	Keyboard Mouse Support	Audio Support
ST-C5KVM-300	VGA	Yes	No
ST-C5KVMA-300	VGA	Yes	Yes
ST-C5V-300	VGA	No	No
ST-C5VA-300	VGA	No	Yes

MATERIALS

Materials Included with this kit:

- ✓ NTI XTENDEX Local Unit
- ✓ NTI XTENDEX Remote Unit
- ✓ 120VAC or 240VAC at 50 or 60Hz-9VDC/1.0A AC Adapters (KVM/KVMA models include 2, V/VA models include 1)
- ✓ This owner's manual

Additional materials may need to be ordered, depending upon the configuration:

- CAT5/5e/6 unshielded twisted-pair cable(s) terminated with RJ45 connectors wired straight thru- pin 1 to pin 1, etc. (see pg. 12 for proper EIA/TIA 568 B wiring method)
- Cable(s) needed if Local Unit will be located further than 15" from the CPU

Model	Cable(s) needed
ST-C5KVM-300	VKMEXT-xx
ST-C5KVMA-300	VKMEXT-xx and SA-xx-MF
ST-C5V-300	VEXT-xx
ST-C5VA-300	VEXT-xx and SA-xx-MF

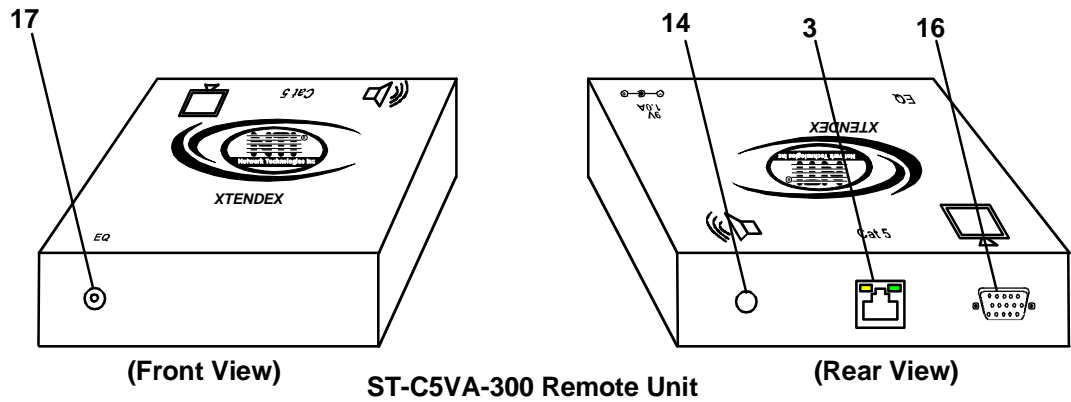

Contact your nearest NTI distributor or NTI directly for all of your KVM needs at 800-RGB-TECH (800-742-8324) in US & Canada or 330-562-7070 (Worldwide) or at our website at <http://www.networktechinc.com> and we will be happy to be of assistance.

FEATURES AND FUNCTIONS

1. Green LED- power indicator- illuminates when power has been supplied to the unit
2. Yellow LED- traffic indicator- illuminates when there is communication between the local and remote units
3. Cat 5- RJ45 female- for connecting the CAT 5 cable
4. Video Connector- 15HD female- for connecting the local user's VGA monitor
5. Audio Jack- 3.5mm stereo audio jack- for connecting to local speakers (models with audio support only)
6. Keyboard Connector- purple female 6 miniDIN- for connecting the local user's keyboard
7. Mouse Connector- green female 6 miniDIN- for connecting the local user's mouse
8. Video Connector- blue 15HD male- for connecting to the video port on the CPU or KVM switch
9. Mouse Connector- green male 6 miniDIN- for connecting to the mouse port on the CPU or KVM switch
10. Keyboard Connector- purple male 6 miniDIN- for connecting to the keyboard port on the CPU or KVM switch
11. Audio Plug- 3.5mm stereo audio plug- for connecting to CPU audio line out (models with audio support only)
12. Keyboard Connector- purple female 6 miniDIN- for connecting the remote user's keyboard
13. Mouse Connector- green female 6 miniDIN- for connecting the remote user's mouse
14. Audio Jack- 3.5mm stereo audio jack- for connecting to remote speakers (models with audio support only)
15. 9VDC- 1.0A- connection jack for the AC adapter

- 16. Video Connector- 15HD female- for connecting the remote user's monitor
- 17. "EQ" screw- for manually adjusting video quality

LIMITATIONS

- Hot-plugging of devices is supported provided devices were originally connected at power-up.
- In order for two users to share a PS/2 CPU, the user in control must pause for at least 3 seconds before another user can take control. After the 3 second pause, either user can take control of the CPU.

For models with audio support:

- The audio input of the XTENDEX with audio support is compatible with the following standard CPU audio outputs:
 - Line out - typically lime green in color
 - Speaker out- typically orange in color
 - Headphone out- typically located on the CD-ROM
- The audio output of the XTENDEX with audio support is compatible with self-powered stereo speakers.

PREPARATION FOR INSTALLATION

- Locations should be chosen for the monitors, mice, and keyboards that also have space to connect the Remote and Local Units within the distance provided by the cables. If extension cables are needed, contact NTI for the cables required.
- The CAT5 cables must be run to the locations where the Remote and Local Units will be connected. Be careful to route the cables away from any sources of magnetic fields or electrical interference that might reduce the quality of the video signal (i.e. AC motors, welding equipment, fluorescent lighting, etc.).
- All cables should be installed in such a way that they do not cause stress on their connections to the equipment. Extended lengths of cable hanging from a connection may interfere with the quality of that connection. Secure cables as needed to minimize this.
- Properly shut down and disconnect the power from the CPU and monitors to be separated. If other equipment is involved whose connections are being interrupted, be sure to refer to the instruction manuals for that equipment for proper disconnection and re-connection procedures before proceeding.

Note: *CAT5 connection cable used between NTI XTENDEX Series Local and Remote or any XTENDEX Series products should not be run underground, outdoors or between buildings.*

WARNING: *Outdoor or underground runs of CAT5 cable could be dangerous and will void the warranty.*

INSTALLATION

Installing The Remote Unit

1. Position the Remote Unit such that the CAT5 cable, the monitor cable, device cables, and the AC adapter power connector can each reach the Remote Unit without putting strain on the cables.
2. Connect the monitor cable to the female 15HD video connector on the Remote Unit.
3. Connect the device(s) to the Remote Unit (see Fig. 1)(KVM models only).
 - a. Connect the keyboard to the purple female 6 pin miniDIN connector on the Remote Unit.
 - b. Connect the mouse to the green female 6 pin miniDIN connector on the Remote Unit.
4. If the Remote Unit has audio support, connect the cable from the remote speakers to the 3.5mm stereo audio jack on the Remote Unit. (See Fig. 2)

Figure 1- Connect the Extended Components to the Remote Unit

ST-C5KVMA-300 Remote Unit

Figure 2- Connect speakers to the Remote Unit

Connect the CAT5 cable

Make sure the CAT5 cable has been installed in accordance with the “Preparation for Installation” instructions on page 3. Connect the CAT5 cable to the “Cat 5” port on the Remote Unit. (See Fig. 3.) When properly inserted the CAT5 cable end should snap into place.

Note: If an RJ45 wall outlet is being used, connect the other end of the extension cable to the RJ45 wall outlet.

WARNING: Never connect the XTENDEX to an ethernet card, ethernet router, hub or switch or other ethernet RJ45 connector of an ethernet device. Damage to devices connected to the ethernet may result.

Figure 3- Connect the CAT5 cable to the Remote Unit

Installing The Local Unit

1. Make connections for a local user (see Fig. 4)
 - a) Connect the cable from the local user's VGA monitor to the female 15HD port on the Local Unit.
 - b) Connect the local user's mouse to the green 6 pin miniDIN female port on the Local Unit.
 - c) Connect the local user's keyboard to the purple 6 pin miniDIN female port on the Local Unit.

Figure 4- Connect the local user to the XTENDEX Local Unit

- d) If the Local Unit has audio support, connect the cable from the local speakers to the 3.5mm stereo audio jack on the Local Unit. (See Fig. 5)

Figure 5- Connect speakers to Local Unit with audio support

2. Plug the cables of the Local Unit into the back of the CPU. (See Fig. 6.)

- a) Connect the blue 15HD cable end to the VGA port on the back of the CPU.
- b) Connect the green 6 pin miniDIN cable end with the mouse symbol on it to the mouse port on the back of the CPU. (KVM models only)
- c) Connect the purple 6 pin miniDIN cable end with the keyboard symbol on it to the keyboard port on the back of the CPU. (KVM models only)

Figure 6- Connect the Local Unit with VGA video and audio support to the CPU

- d) If the Local Unit has Audio support, connect the black 3.5mm stereo plug into the "line out", "spkr", or "headphones" jack on the back of the CPU. (See Fig. 6)

Notes:

If all 3 jacks are available, use the jack marked "line out".

The "line out" jack is typically lime green and may be marked with this symbol 

The "spkr" jack is typically orange, and may be marked with this symbol 

The "headphones" jack may be marked with this symbol 

Connect The CAT5 Cable

Connect the CAT5 cable to the “Cat 5” port on the Local Unit. (See Fig. 7.) When properly inserted the cable end should snap into place.

Note: *If an RJ45 wall outlet is being used, connect the other end of the extension cable to the RJ45 wall outlet.*

WARNING: *Never connect the XTENDEX to an ethernet card, ethernet router, hub or switch or other ethernet RJ45 connector of an ethernet device. Damage to devices connected to the ethernet may result.*

Figure 7- Connect CAT5 cable to Local Unit

Plug-in and Boot Up

For ST-C5V-300 and ST-C5VA-300 models

1. Plug the power cord from the monitor into the power outlet.
2. Connect the AC adapter power connector to the 9VDC ports on the Local Unit. Plug the AC adapter into a power outlet. The green LED on the RJ45 connector of both the Remote and Local Units should illuminate, indicating that a proper power connection has been made to them. (See Fig. 8.)
3. Turn ON the CPU and Monitor. They should each react as if they were directly connected to each other.

Note: *The yellow LED on each RJ45 connector will illuminate only on VA models anytime data traffic is passing between the Local and Remote Units, indicating proper CAT5 cable connection and communication. (See Fig. 7)*

Figure 8- Connect the AC adapter to the Local Unit

For ST-C5KVM-300 and ST-C5KVMA-300 models

4. Plug the power cord from the monitor into the power outlet.
5. Connect the AC adapter power connectors to the 9VDC ports on the Remote and Local Units. Plug each AC adapter into a power outlet. The green LED on the RJ45 connector of the Remote and Local Units should illuminate, indicating that a proper power connection has been made. (See Fig. 9.)
6. Turn ON the CPU and Monitor. They should each react as if they were directly connected to each other.

Note: The yellow LED on each RJ45 connector will illuminate anytime data traffic is passing between the Local and Remote Units, indicating proper CAT5 cable connection and communication. (See Fig. 9)

Front View of ST-C5KVM-300 Remote Unit

Figure 9- Connect the AC adapter to the Remote Unit

VIDEO QUALITY ADJUSTMENT

It is possible that on initial startup the image on the monitor will not be as crisp as the image normally is. This is due to the frequency characteristics of the CAT5 cable. It may be necessary to turn the "EQ" screw on the Remote Unit to equalize the signal between the Local and Remote Units. Turn the "EQ" screw using a very small screwdriver (see Fig. 10) until the image is crisp and clear. Turn the screw counterclockwise if the image is not crisp and clear enough. Turn the screw clockwise if the image has been over-corrected (such that horizontal lines appear to trail or shadow at the edge of an open window). A very small amount of rotation will make a minor change in the image. Ultimately, the image quality should improve to a satisfactory level.

Note: When the cable is longer than 150 feet some colored lines can be seen at the black-to-white transitions. This is a normal behavior and is caused by the different twisting rates of each pair of wires in the CAT5 cable.

TECHNICAL SPECIFICATIONS

All Models	
Video Compatibility	XGA, VGA
Video Coupling	DC
Video Connectors	HD15 male to CPU HD15 female to monitor
Input / Output Impedance	75 Ohms
Input Horizontal Frequency Range	15kHz to 130 Hz
Input Vertical Frequency Range	30 Hz to 150 Hz
Sync Types Supported	Separate and composite TTL Level and sync on green
Video Maximum I/O Levels	1.45Vp-p
Models with Keyboard/Mouse support	
Keyboard/Mouse Connectors	Female 6 pin miniDIN to Keyboard and Mouse Male 6 pin miniDIN to CPU device ports
Mouse and Keyboard Compatibility	All PS/2 mice and keyboards
Keyboard and Mouse Current Rating	500mA maximum
Models with Audio Support	
Audio Connectors	3.5mm stereo jack to speakers 3.5mm stereo plug to CPU
Signal Type	Line Level, stereo, unbalanced
Audio Frequency Response	20Hz to 20Khz, \pm 1dB
Signal-to-noise ratio	76 dBA
Total Harmonic Distortion and Noise	0.017%
Stereo Crosstalk	-70 dB
Audio Maximum I/O Levels	3.1Vp-p
General	
Interconnect Cable	CAT5/5e/6 Solid UTP EIA/TIA 568 B wiring w/ male RJ45 connectors
Local Unit Power ST-C5KVM/ST-C5KVMA ST-C5V/ST-C5VA	<ul style="list-style-type: none"> • 120V or 240V at 50 or 60Hz-9VDC/1.0A via AC Adapter • 120V or 240V at 50 or 60Hz-9VDC/1.0A via AC Adapter

Distances and Resolutions for CAT5/CAT5e and CAT6 Cables Unshielded Twisted Pair (UTP) Resolutions

UTP CABLE	DISTANCE (feet)	RESOLUTION
CAT5/CAT5e	300	1280x1024 at 60Hz
CAT5/CAT5e	150	1600x1200 at 60Hz
CAT5/CAT5e	100	1920x1440 at 60Hz
CAT6	300	1024x768 at 60Hz
CAT6	150	1280x1024 at 60Hz
CAT6	100	1600x1200 at 60Hz

INTERCONNECTION CABLE WIRING METHOD

The CAT5 connection cable between the Remote and Local is terminated with RJ45 connectors and must be wired according to the EIA/TIA 568 B industry standard. Wiring is as per the table and drawing below.

Pin	Wire Color	Pair	Function
1	White/Orange	2	T
2	Orange	2	R
3	White/Green	3	T
4	Blue	1	R
5	White/Blue	1	T
6	Green	3	R
7	White/Brown	4	T
8	Brown	4	R

TROUBLESHOOTING

Each and every piece of every product produced by Network Technologies Inc is 100% tested to exacting specifications. We make every effort to insure trouble-free installation and operation of our products. If problems are experienced while installing this product, please look over the troubleshooting chart below to see if perhaps we can answer any questions that arise. If the answer is not found in the chart, please check the FAQs (Frequently Asked Questions) at our website at <http://www.networktechinc.com> or contact us directly for help at 1-800-742-8324 (800-RGB-TECH) in US & Canada or 1-330-562-7070 worldwide. We will be happy to assist in any way we can.

Problem	Cause	Solution

WARRANTY INFORMATION

The warranty period on this product (parts and labor) is one (1) year from the date of purchase. Please contact Network Technologies Inc at **(800) 742-8324** (800-RGB-TECH) or **(330) 562-7070** or visit our website at <http://www.networktechinc.com> for information regarding repairs and/or returns. A return authorization number is required for all repairs/returns.

Note: CAT5 connection cable used between NTI XTENDEX Series Local and Remote or any XTENDEX Series products should not be run underground, outdoors or between buildings.

WARNING: Outdoor or underground runs of CAT5 cable could be dangerous and will void the warranty.
